STAT

Dear

STAT

Thank you for your letter of 25 October concerning your thoughts on possible avenues of development in the PI field. I apologize for not responding sooner, but I am sure you will understand that things have been a bit busy of late.

As you have so well discerned, the problem of deriving pertinent information from available resources is of continuing concern to me and one which is under constant study and development. I am happy to hear that your ideas were accepted by the Air Force and that a program is developing along these lines even though they chose to do so without benefit of your counsel. I am making inquiries as to the status of their program, and I am grateful to you for bringing it to my attention.

After I receive a report on this matter, we can consider your proposal in terms of possible applications here. If you are in town sometime in the coming months, perhaps we can get together for lunch and discuss your ideas in greater detail.

Sincerely,

Arthur C. Lundahl
